

THE BIG QUESTION

Why are our neighbors who are experiencing homelessness healing from medical procedures on the streets?

The impact felt from being released time and time again to the streets is **debilitating**.

Recuperative Care
can help *break* this cycle.

RECUPERATIVE CARE

Housed and healed,
clients live longer,
happier lives.

RECUPERATIVE CARE IS THE SOLUTION

There are approximately **80** Recuperative Care Centers in the country offering safe patient discharge alternatives and significant hospitalization cost savings. We are proud to be **1 of 3** centers in Michigan.

OUR PROGRAM
AT THE ROBERT J DELONIS
CENTER!

WHAT IS RECUPERATIVE CARE?

Alone with no place to heal, infection, injury and worsening health lead to expensive re-hospitalization.

By being discharged to our Medical Recuperative Care Program, a client receives shelter, time to recover, medical supervision, case management and a bridge to permanent housing.

HELP US WITH OUR MISSION

Our hope is to work with and release patients diligently from our Medical Recuperative Care Program into permanent housing within 60 days.

We are looking to our local and state communities to help us **end homelessness one person at a time.**
